I did not write any code, just copy and pasted the value from a password field. Anyone know what is going on? When i click on the "Delete" button it throws the error: System.Security.Cryptography.CryptographicException: Unable to decrypt encrypted data. private static string Encrypt(string text) { string key = "08ef080502412ad260d5cfe9"; string salt = ""; string iv = ""; var cryptoProvider = new RijndaelManaged(); var symmetricKey = new Rfc2898DeriveBytes(key, salt, 100); var bytes = Encoding.UTF8.GetBytes(text); var stream = new MemoryStream(); var cryptoStream = cryptoProvider.CreateEncryptor(symmetricKey, iv); cryptoStream.Write(bytes, 0, bytes.Length); cryptoStream.FlushFinalBlock(); stream.Write(cryptoStream, 0, cryptoStream.Length); stream.Position = 0; var result = Convert.ToBase64String(stream.ToArray()); return result; } private static string Decrypt(string text) { string key = "08ef080502412ad260d5cfe9"; string salt = ""; string iv =
