+ Achievements May 19th, 2015 9:30 AM CDT With many of the crappiest weapons making their return to WW2 Online as part of the Battle Master packs for the ImPulse Force DLC, the already widely deemed to be poor quality weapons, have been buffed. In a scenario where all have gotten a chance to be buffed, it's hard to say who has been the most deserving of such an upgrade. But, we can look to all of us here at Fogem that will be responsible for it, after all, we did make them, you can't exactly call buying them from somebody else responsible for the creation of said weapon. The two weapons with the biggest buffs are the Peashooter and the DooDoo God, though the Inferno Launcher continues to get the worst because there is an inconsistency. The Peashooter: Get rid of the bleeding DYNAMITE ammo that the Peashooter is currently using. Face side of the globe's and front face side will get 3 each (up from 1) and the back face side will get 2. The shoulder mounts will go from having 4 per shot to 4 per shot. Killzone/support will get handguards that cover the entire weapon and will be automatically activated when u move or sprint. and the rest of the weapon will be very similar to how it was before the update. The Peashooter had a design that has a few downsides. It had a short firing time, a nonexistent recoil in the early versions, which made it a defenseless weapon, and the middle of the shoulder mount was placed right where when u start sprinting the weapon goes down to your thigh. There's really no place for this weapon to be because of the short firing time and when you shoot your rear face side of the globe the weapon doesn't end up in the center of the intended target, it ends up in a fall-off. The Praxiscope: A Gold Plated base model will be released that for the first time will have dual-barrels. A black antennae look will be available (up from green) and will be able to turn on/off single barrel. Shoulder mount will auto-cycle and will limit move change of the weapon. The barrel will now have 2 groove locations, like how tanks work. This will however not have any
