A powerful and unique Touhou project where you take on the side of a "sanctuary" (tea house) in charge of a powerful witch called Nagae Iku. It was created in the Touhou 14th project. The goal of this game is to clear the hard-mode stage 6 or 7. The "Sanctuary" (tea house) is a place where various individuals live. There is a shrine room that you can use to pray to someone's aid, and in that room is a magic seal. The magic seal can be used to open a portal to the special stage "Rest Room" (private room). In addition to that, a Tower and another tea house (called this game's version of a Home) has been added. Nagae Iku's tower is a tower that challenges the opponent to find the best way to survive. Nagae Iku's tower can be up to Level 7 with all possible items. In addition to that, the stage features a levelling system where players can level up to obtain stronger characters. Tower and stage management and the details of the supporting characters in the game itself is also included. The main characters and their evolution are also included in the story. Also, a new story to the main characters of Touhou Project is added. Touhou Project and Yosuga no Sora is being used as the basis of the game's battle system. You can play as each character in the game, and you can level your characters using the data shared with the enemy (tea house). Nagae Iku will be unlocked at the beginning of the stage once it is cleared, and the newly-added Shou and Mikoto will be unlocked at the time of connecting the data to the tea house, too. Story: In a small town in the Touhou area, there is a shrine dedicated to a witch. It is known to local villagers that a witch has lived in this shrine for a long time, and no one in this town is willing to enter the shrine. In reality, the shrine is a medium for the witch to use to communicate with others. In the shrine, the witch does not say anything, but there are times when the witch does so through the medium. The shrine for the witch is called the "Sanctuary" (tea house). There is a famous witch in this area who is called the "Ven

Neptunia is a mythical realm that exists on the boundary of our world and the digital universe. This world consists of four countries, each of which is a single continent surrounded by an ocean, and within each country lives a goddess. They live peaceful lives, but have an unshakable desire to begin the "History of the World," which is an eternal struggle of peace and war. Known for being a no-nonsense game that has no "fluff," each of the four Goddesses in the game is truly unique. By providing a new battle system and changing up the way the girls fight with weapons, Neptune's combat is truly unlike any other game. The new combat system is a true online game where you can enter into battles and help your sisters! Specifically, the game will have a ranking system. You will be able to gain "rare medals" in battle, and this can advance you up the ranking system. It is possible that fighting may cause some unexpected things to happen, but the girls will bring you back from any situation. "HIS" is a battle system where the player does not directly control the NPC characters, but rather, takes control of a "Hero." The Hero fights alongside the girls, and is much stronger than they are, but the player can use various skills to defeat the girls' abilities. You are in control of the battles, and the girls will do as you direct them, no matter the situation. From the "Neptunia Online" browser game to a character battle game, "Neptunia Online" is an original online game where you can go anywhere in the world, interact with anyone, and buy any item. "Neptunia Online" is published by the best studio in Japan, SCJ, known for "Bayonetta," "Metal Gear Solid," and "P4N (Project 4: Neo)." For more information, please check out: Game Contents Server: Steam Play Online: "Neptunia Online" How to play 1. Select your weapon from the weapon menu. 2. Press the action button to use your character's special ability. The skills will gradually increase your damage and the combo count will increase. What's new:

Announced Soundtrack serviced by the Lakeshore label is now available as a limited edition CD. In celebration of Naughty Dog's video game The New Lands, Lakeshore Records have announced the soundtracks for both Collector's and Remastered Editions. Both soundtracks are available to pre-order direct from Lakeshore Records' website. It is also worth noting that, quite extraordinarily, the Original Game Soundtrack for The New Lands can now be found on Amazon, although it can only be downloaded in MP3 format. For this you'll have to have a Kindle account. The New Lands is a self-proclaimed horror/comedy 'teenager flick' inspired by popular cartoon show, Rugrats. The game will continue the story where the Rugrats debut album was released and asks players to run through the same familiar hallways, with a few twists that may or may not be linked with the Rugrats series. The New Lands Remastered Edition will be available on 14th July 2015 and is priced at £15. The Collector's Edition will cost £20 and is due for release in early July. Much anticipated, from Scott Cawthon's Insane Clown Posse point of view anyway - their entire "Are You Ready?" double album from iCon 09 even has double the bonus tracks, but no new ICP content! I've been waiting for almost a year for something like this from them. Complete Series on Netflix Just got done watching the HOTTEST show of all time, Netflix's The OA, off and on during the last couple of days. If you've not seen it yet, then luckily you're in the right place. Tissuebox1171 has also uploaded two episodes of it as well. It made me watch the entire series in just a couple of days, if that's something you want, I highly suggest you watch it. And for those of us who aren't musically inclined and don't know how to play guitar, download the awesome song, "The Call". I will say that

from what I remember of it, the second season is better overall, but whatever. Enjoy! Here is today's price of $1.01. Will it be below $1.00 today?
