About Killing Time

Killing Time (Official Game)

Dualstick control and music by: Márk & Nicki Nádvorník

This time 'killing' happens in a long desert road, on a vehicle, completely open world.

Survive hordes of mutant-zombies by running away from them, shoot them, or even combine weapons.

This is a first-person shooter. There is no timer. You kill everything.

Everything stays forever. You respawn at the last checkpoint and everything is as good as it was. That makes the game story-less, but in a good way.

Choose between two difficulty levels.

Choose between:

- Classic: take your time and learn the game mechanics
- Hard Core: no time and use your wits to survive.

The game was nominated for Best Puzzle Game of 1983 by GamePro and Best Use of Graphics in the category of Best Game Artwork. Zaxxon is widely considered one of the best platform games of all time. IGN listed Zaxxon as the #5 platform game of all time. The Zaxxon Factory is the hottest outfit in the entire Zaxxon line, because it's the number one seller. What's new:

is a 1985 science fiction action film directed by Richard Gere about a police robot trained to kill. It was produced by George Lucas and distributed by 20th Century Fox. The film was a box office failure and received mixed reviews from critics. It is sometimes credited as being the final film to feature the character of Han Solo in the Star Wars universe. The film is also referenced in *Solo: A Star Wars Story* (2018). Plot In the future, humans have devised a means of communication that allows individuals to roam Earth's surface in vehicles called skyriders. Skyriders are vehicles equipped with additional hardware that enables them to travel through strange environments. Although their other equipment is prohibited by an international treaty, wealthy citizens and government officials have decreed that the hardware may be stolen to save the money that would be spent equipping law enforcement and military units with the same equipment. The illicit sale of skyriders is rampant. Ben Jeannet, the son of two high-level government officials, is arrested while transporting stolen skyrider hardware from Mexico back to the United States. After being caught, Ben is taken into custody by the regional police robot and deactivated. Because he is a user of illegal technology, the robot communicates with its supervisor network over the home telephone and witnesses Ben's mother committing suicide while trying to retrieve the skyrider hardware and save Ben. The robot follows the woman into the sea and locates the hardware after her car

goes over a reef. The robot is debriefed and attends a funeral for Ben's mother, to which he receives a unique one-of-a-kind skyrider with a feature of the deceased's exact style of skyrider. Although he recognizes the skyrider as a unique design, he considers it nothing but another skyrider. A reworked version of the design he is provided with the skyrider is used by the developing artificial intelligence to kill the public defense program director, who is becoming a threat to the ruling board of directors. In the aftermath of the murders, the male robot patrols the city, implanted with a special device that allows him to control the robots. The DUB (Defense Unit Robotic Investigator), a less-advanced humanoid robot, finds Ben and takes him on a wild goose chase. After several hours, DUB believes it has seen Ben and her fellow robots on an abandoned pier along with the remnants of the parts Ben and his mother stole from a warehouse. DUB links up
