Youtube And Facebook Video Downloader is a simple application that, as you have probably already guessed, enables you to grab videos from YouTube and Facebook. It supports batch downloading and offers two quality options, but no other advanced features. Great tool for saving large numbers of videos The application really shines when it comes to downloading multiple videos, as you can provide any number of URLs and let the program do its thing while you focus on more important tasks. You can specify whether the high or low-quality versions of the clips should be grabbed, as well as set the target location. Once the download process has started, you can interrupt it at any time and keep the videos that were already saved. Simple utility that offers a very limited array of features While you can choose between two quality options, the maximum resolution the application can save YouTube videos in is 720p. Also, you cannot change the output format, and it is not possible to extract audio tracks separately. Moreover, very little feedback is provided, as the program does not display the file’s size, download speed or estimated completion time. Minimalistic user interface Youtube And Facebook Video Downloader features a basic user interface that, while not very impressive, is good enough to get the job done. However, the application window cannot be resized, and you cannot send the program to the system tray. This feature would have come in very handy when downloading large numbers of videos. All in all, Youtube And Facebook Video Downloader is a simple, no-nonsense download manager that allows you to grab videos from YouTube and Facebook. It does not offer a lot of features, but it supports batch downloading and is relatively easy to use. 5/5 (3) Youtube And Facebook Video Downloader Great tool for saving large numbers of videos Youtube And Facebook Video Downloader is a simple application that, as you have probably already guessed, enables you to grab videos from YouTube and Facebook.
