In such an electric power steering apparatus, a control device (ECU) generally includes an EMC (electromagnetic compatibility) control circuit, and a power steering control circuit is provided so as to be separated from the EMC control circuit, to ensure EMC characteristics. The power steering control circuit includes a microcomputer system including a CPU, a power supply circuit (PSU) for providing power to the microcomputer system, and the like. In recent years, there has been a tendency that an ECU is miniaturized. Accordingly, there has been a demand for further
