Songs Info Send us your pictures! To become a model, all you have to do is send us your photos and we will contact you by email.Q: c# Assigning only parts of string variable this may be a very stupid question, but i am really trying to achieve something, and i have just stuck. So for example i have the string "this is my app name" public String AppName { get; set; } So i am setting this variable to have "my app name", i know it is probably really easy but i need help with setting this one. I thought it would be something like string _AppName = "my app name"; AppName = _AppName.Substring(0,1); But it doesn't seem to work. So i just want to set AppName to "my" Thanks in advance! A: You're looking for.Substring(). string _AppName = "this is my app name"; AppName = _AppName.Substring(0, 2); A: you could do it with String.Substring(int index, int length). 105625" ry="37.5" x2="100" x1="56.25" x2="37.5" ry="7.5" x1="14.375" x2="-4.375"/>
