So you are a member of some social site and uploads your favorite holiday albums of photos and then uploads another folder and makes your guest book. You can zoom into the photos a bit and look at your photo and retouch it and then choose how to share it. You can now also download the photo directly from the social site and then use the Photoshop mobile app to open and edit your new image. And you can also get the latest desktop version of the software through Adobe Apps website. Similar to what you'll get with the App Store, this downloading process usually takes a day or two but you'll have the latest version. It's finally a little easier to get your hands on the latest version of Photoshop CC.
